Need a Manual Hoist with muscle?

Discover why our manual hoists are recognized as Canada's #1 choice for heavy duty applications. The difference is these products are engineered to be smaller, lighter, and stronger so that they stand up over long periods of time. The L5LB lever and M3CB hand chain hoists are now available with an optional slip clutch that protects you and the hoist in the event of an excessive overload.

L5LB Lever Hoists

Ideal for pulling, lifting, or tensioning there are few material handling puzzles that can't be solved with a Kito lever hoist.

FEATURES

- Patented compact, lightweight design
- Durable, high-impact steel housing
- Smooth & easy freewheel operation

AVAILABLE IN

- $\frac{3}{4}$ to 9 metric tonne capacity
- Standard or Slip Clutch models

M3CB Hand Chain Hoists

Kito's hand chain operated hoists have earned a reputation for delivering superior performance and value.

FEATURES

- Low hand-force operation
- Durable, high impact steel housing
- Premium grade components

AVAILABLE IN

- $\frac{1}{2}$ to 50 metric tonne capacity
- Standard or Slip Clutch models
- Hook, Plain or Geared trolley mount

Need a Powered Hoist that performs?

Leading edge manufacturing techniques increase product quality and enhance performance. The smooth and quiet operation of our powered hoists and superior operating economics give you unmatched value for your hoisting needs. Some models of the ER2 now feature, as standard, an under-the-cover VFD that adds adjustable speed operation, and soft-start/soft-stop load control.

ER2 Electric Hoists

Leveraging today's most advanced hoisting technology; this high performance hoist exceeds the expectations of the world's most demanding users.

FEATURES

- Industry leading duty ratings
- Advanced smart brake technology
- Super-strength extended life load chain

AVAILABLE IN

- 1/8 to 20 metric tonne capacity
- 220/440/575 volt, 3 phase
- Single or Dual Speed
- Hook, Plain, Geared, or Motorized trolley mount

TCR Air Hoists

When applications demand 100% duty cycle hoisting, Kito's air powered hoists deliver.

FEATURES

- Outstanding feathering control
- Heavy duty self-adjusting brake
- Quiet external muffler

AVAILABLE IN

- 1/4 to 25 metric tonne capacity
- Pendant, Cord, or Manipulator control
- Hook, Plain or Geared trolley mount

THE TRUSTED CHOICE OF HEAVY INDUSTRY

We understand the demanding operational environments you work in. An understanding that has inspired us to deliver the world's most proven and trusted chain hoists. Kito has earned this reputation by answering the questions that matter to you when selecting a chain hoist:

SAFETY

Hoists are used by people. That's why we believe a hoist safety system starts with reliable, well engineered product and ends with tangible operator training. Our free **Hoist Safety & Repair Training** programs are available to you so that the experience and specialized knowledge of our Technical Trainers can help make your worksite safer.

DURABILITY

You can count on years of trouble-free hoisting because Kito hoists use quality components that stand up, even in the most severe conditions. Look no further than Kito chain. Made from heat treated alloy steel, Kito chain leads the industry in terms of total uniform strength and abrasion resistance.

PERFORMANCE

Our focused use of cutting-edge hoisting technology allows us to deliver products that help you improve your productivity and cost efficiency. From the smooth and easy freewheel operation of the LSLB lever to the soft-start/soft-stop load control of the ER2, you can count on Kito's operator friendly performance.

"We have made extensive use of Kito products and services and have developed a strong relationship with Kito. The solid design, ease of use and maintenance combined with excellent product support has made Kito our hoisting product of choice."

PCL Industrial Management Inc.

Need your tools to be portable?

Kito's ultra-compact hoists weigh less than you think, empowering you to take one into the field wherever you go. These small and light hoists make no compromises on durability, and will impress you with their smooth operation.

LX Series LIGHT WEIGHT LEVER

- 1/4 and 1/2 tonne
- Pocket sized design
- Premium grade components
- Allows precision placement

CX Series HAND CHAIN HOIST

- 1/4 tonne
- Ultra-compact design
- Built-in load limiter
- Premium grade components

Need a workhorse on a budget?

For the everyday material handling challenges you face, these dependable hoists deliver value, no matter how you measure it. Low total cost of ownership and a workhorse reputation make the CF and EFS Series hoists a smart investment.

CF Series HAND CHAIN HOIST

- 1/2 - 3 tonne
- High efficiency design
- Die cast aluminum housing
- Maintenance-free bearings

EFS Series SINGLE PHASE ELECTRIC

- 1/2 - 2 tonne
- Fail-safe pull-rotor brake
- Built-in slip clutch protection
- Weather-tight construction

Need a boost in productivity?

The smooth and precise adjustable speed operation on the ED hoists and the variable speed operation on the TCS hoists gives you improved productivity. These hoists can operate at very high speeds adding a dimension of versatility to your application.

ED Series HIGH SPEED 115V ELECTRIC

- 100 - 480 kg
- Compact and portable design
- Built-in slip clutch protection
- High speed with low headroom

TCS Series HIGH SPEED AIR POWERED

- 1/2 - 1 tonne
- Outstanding feathering control
- Ultra-high speed operation
- Customizable speed settings

Need to ease the stress of repetitive tasks?

The advantages of ergonomic controls are best understood from the operator's perspective. Repetitive tasks are made more comfortable and more efficient with easy one-handed operation.

ED Series 115V ELECTRIC

- 100 - 240 kg
- Compact and portable design
- Built-in slip clutch protection
- High speed with low headroom

TCR Series AIR POWERED MINI

- 1/2 tonne
- Outstanding feathering control
- Heavy-duty self-adjusting brake
- Quiet external muffler

ER2 Series 3 PHASE ELECTRIC

- 1/2 and 1 tonne
- Industry leading duty ratings
- Advanced smart brake technology
- Super-strength extended life chain

Need to add versatility?

Not all trolleys are equal. Wheels on Kito trolleys and end trucks are built using advanced heat-treating techniques with the sole focus of reducing wear on the beam. You can expect lower maintenance costs by selecting a Kito trolley or end truck.

TS2 Series PLAIN OR GEARED TROLLEY

MR2 Series 3-PHASE MOTORIZED TROLLEY

HPC Series TOP RUNNING OR UNDER- RUNNING END TRUCK
